

**Have you been treated for melanoma in the last 5 years?  
If so, you might be able to take part in ASICA**

We are investigating whether a digital app (ASICA) can help you to use a hand-held tablet computer to do more regular and effective total-skin-self-examinations and whether this would lead to earlier detection of recurrent and new melanomas

**Participants who take part in the study will either:**

- attend their routine melanoma follow-ups; OR
- use the ASICA app in addition to their routine follow-ups.

**Please ask your clinician for more information or email  
([asica@abdn.ac.uk](mailto:asica@abdn.ac.uk)) or phone (01224 438199).**
