The **PARTIAL** Trial:
A randomised trial of the clinical and cost effectiveness of complex PARTIAL vs radical nephrectomy for clinically localised renal cell carcinoma

A message from the Chief Investigators

Welcome to the Dudley team (led by Mr Syed Shahzad) who opened to recruitment in June – good luck with recruitment! In other good news, **we have reached 20% of our overall participant target!** Well done to all recruiting sites. We have asked the funder for a six-month extension to the internal pilot (to 31 Nov 2024) with a view to extend the overall recruitment period. Please do keep recruiting and we will inform sites of the outcome. We are also planning an investigator meeting (by Teams) towards the end of summer. Further details will be circulated soon and we hope you will be able to join us.

Professor Naeem Soomro and Professor Rakesh Heer

Well done!

Congratulations to Eastbourne and Royal Free for recruiting their first participants and **Glasgow, Cardiff and Leeds** for moving up the league table!

Renal function and harms are the primary outcomes for PARTIAL. Please ensure that eGFR measurements are completed at the key timepoints (1 week and 1 month **after surgery** and 6, 12 and 24 months **after randomisation**). Did you know you can check upcoming eGFR due dates for your participants on the study website? You will find this under 'Site tasks' > 'eGFR measurements due' on the study dashboard (the first page after login).
